SUMMARY

Driven Software Engineer leveraging AI and data science expertise to tackle real-world challenges, with a proven ability of architecting scalable backend systems and deploying Retrieval-Augmented Generation (RAG) models. Proficient in streamlining CI/CD pipelines, Machine Learning, and handling complex data, fueled by a relentless passion for innovation. Currently pursuing a Master's in Computer Science, eager to collaborate on impactful projects that push the boundaries of technology.

EDUCATION

Georgia State University

M.S. in Computer Science; GPA: 4.10

Jan 2026 – Present

Atlanta, GA, USA

Vellore Institute of Technology

B.Tech in Computer Science Engineering; CGPA: 8.77

Jul 2018 – Apr 2022

Vellore, India

EXPERIENCE

MAGNUS Consulting

Software Engineer

Mar 2025 – Oct 2025

Kathmandu, Nepal

- Spearheaded the development and deployment of an internal document management application, with integrated SonarQube for continuous code quality inspection and OAuth 2.0 and Google Sign-In authentication flow, as well as relational DB design for internal document management.
- Implemented advanced security features using Spring Security to enhance system reliability and data protection.

Intralinks

Associate Software Engineer

Jun 2022 – Nov 2024

Hyderabad, India

- Architected backend infrastructure for scalable web applications using Django, Flask, FastAPI, PostgreSQL, Redis, and Nginx.
- Developed event-driven components and listeners for a tracking application, optimizing responsiveness and feature iteration.
- Designed and deployed AI-driven applications in Python, significantly enhancing operational consistency and efficiency.
- Earned the "Invaluable Member" award for successfully spearheading the end-to-end development of RAG pipelines using LLMs.
- Collaborated cross-functionally with data scientists and product managers to seamlessly integrate AI components into production systems.

Intralinks

Software Engineer Intern

Feb 2022 – Jun 2022

Hyderabad, India

- Served as an R&D Intern leveraging the MERN stack to develop innovative solutions addressing existing technical challenges.
- Designed and delivered a functional translation service for a core product, effectively presenting the solution to key stakeholders.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript (Node.js), C++, SQL, Bash

Frameworks & Tools: Django, FastAPI, Flask, Spring Boot, MERN Stack, Docker, Kubernetes (Helm), Git, Nginx, Streamlit

Machine Learning & AI: PyTorch, TensorFlow, LangChain, RAG Pipelines, BERT, OpenCV, Vector DBs (FAISS, Chroma, PGVector)

Databases & Data Science: PostgreSQL, MongoDB, Redis, Pandas, NumPy, Matplotlib, Seaborn

PROJECTS & PUBLICATIONS

Directed Energy Deposition via AI Enabled Approaches | *Complexity Journal*

India

- Co-authored and published research paper under the Ministry of Defense.

Booking Synchronization Engine | *Python, Streamlit*

- Developed a web application using Streamlit to dynamically generate simulated .ics iCalendar files for testing reservation workflows.

Computer Vision & Sequence Modeling | *NumPy, SciPy, BERT*

- Applied 2D FFT spectral analysis and generated BERT vector embeddings for text classification and sequence prediction.

CERTIFICATIONS

Deep Learning (Coursera), COVID19 Data Analysis Using Python (Coursera), Using Python to Access Web Data (Coursera), Data Collection and Processing with Python (Coursera), Physical Science Responsible Conduct of Research (CITI Program)
